

Literature Seminar

This task is to be completed with your group.

The literature seminar consists of two parts:

1. Preparing by reading scientific papers and writing answers to the provided questions. Aim for about half A4 page per question using a font-size of 12pt. Also, for each paper, prepare one possible question for discussion. The summary should be uploaded in the student portal no later than **Monday, October 07**. In the seminar sessions, we will make larger groups consisting of 5 teams. This division will be provided later in the course.
2. Active participation in the seminar, where we will discuss and share our understanding of the material we have read, based on the written preparation assignment.

In the student portal, you will find a file area "Literature Seminar -> Articles". In that folder, you will find scientific papers that we have selected that are relevant to the course, and that we think will be helpful references to complete the written part of the task.

If you for some reason cannot participate in the seminar, you should contact a teacher to get a make-up assignment. Note that this option should only be used if you really can't be here, active participation in the seminars will let you learn also about material that you did not read yourself and you will enhance your understanding of the material in interaction with others.

Together with answers to the questions, each group also need to submit a document explaining group member's contribution. Following is the template of the document.
